

## plasmo at the European Automotive Laser Applications „EALA 2010“

In February 2010, 200 international companies will come together again at the EALA for the European branch meeting of the OEM (Original Equipment Manufacturer) and their suppliers. The conference has also established itself as an important information- and experience exchange for the system tool Laser in the entire field of automobile construction. plasmo is represented with a stand as well as a specialist presentation by plasmo-CTO, Thomas Grünberger.

The next EALA (European Automotive Laser Applications) will be in Bad Nauheim from 3<sup>rd</sup> – 4<sup>th</sup> February 2010. At the EALA, Dr. Thomas Grünberger, CTO of plasmo, will deliver a presentation on the subject of „**Increasing component- and plant complexity with sinking seam-to-seam times.**“ What are the requirements on process monitoring systems resulting from this.“
